

MS-1000/2000 Sign Server

Digital Signage Edge Server

Features

- Router + Name server + DHCP server + DS server all-in-one
- Domain name access (ex. yourname.sign123.net)
- Content management – template, playlist, playlist scheduling
- Scalable from individual use to large-scale digital signage network
- User access control
- Web access no software installation needed

- No dedicated high bandwidth internet needed.
- No high-performance server needed.
- MS-1000 scalable capability can help you easy and low cost to build up large-scale digital signage network.
- MS-1000 will auto-sync each unit to maintain the data, and each player will connect to the nearest server to avoid insufficient bandwidth caused by the traffic.
- User can upload data onto MS-1000 LAN to decrease wait time to upload on the web.
